PROFESSIONAL SUMMARY

Frontend developer with production experience across multiple roles, building for web and mobile. I've built admin dashboards, interactive landing pages, and full-stack web apps, owning the frontend from design handoff to deployment. I care about how interfaces feel: the micro-interactions, the responsive behaviour, the details that separate a UI that works from one that's a pleasure to use.

TECHNICAL SKILLS

Core: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Mobile: React Native (Expo)

Styling: Tailwind CSS, CSS Modules, CSS

UI / Animation: Framer Motion, GSAP Animations.

State & Data: React Context, Redux, Zustand, Supabase

Tools: Git/GitHub, Vercel, Figma, Agile/Scrum

Other: Python, SQL, n8n / AI workflow automation (RAG, AI agents)

PROJECTS

Nora — Next.js, React Native (Expo), TypeScript, Tailwind CSS · [noramum.app](#) ·

An AI-powered companion app for expecting and new mothers, delivering daily emotional check-ins, personalized guidance, and stage-based reminders from pregnancy through the toddler years, built across a Next.js marketing site and native iOS/Android apps.

- Built sections of the marketing site in Next.js + Tailwind CSS, translating designs into responsive, mobile-first layouts with smooth scroll behaviour and clean component composition.
- Built two core in-app features in React Native: a **milestone tracker** where mothers log developmental moments for themselves and their child along a stage-based timeline, and a **gallery** for capturing and organizing memories visually.

DSI Football — Next.js, TypeScript, Tailwind CSS, Supabase, NextAuth · [dsifootball.live](#)

A sports media platform covering 16+ football competitions (Premier League, La Liga, UEFA Champions League, AFCON, Serie A and more) with daily article publishing. I built the writer-facing admin dashboard used by the editorial team to manage every article that ships to the live site.

- Built the full article management workflow. Writers can draft, edit, update, and delete articles, with a built-in analytics view showing how many readers each of their pieces has reached.
- Implemented role-based access control with NextAuth and Supabase, so each writer signs in to their own scoped dashboard and can only manage articles they own, while admins get broader access across the editorial team.

PROFESSIONAL EXPERIENCE

Emerj LLC — Frontend Developer · Jan 2026 – May 2026 · Sheridan, Wyoming, USA. (Remote)

- Built **Nora**, an AI-powered companion app for expecting and new mothers, live on iOS and Android, working across both the React Native mobile app and the Next.js marketing site.
- Built two core in-app features in React Native: a **milestone tracker** where mothers log developmental moments along a stage-based timeline, and a **memory gallery** for capturing and organising photos visually.
- Built sections of the marketing site in Next.js and Tailwind CSS, translating designs into responsive, mobile-first layouts.

HNG — Frontend Developer · Oct 2025 – Dec 2025 · Lagos, Nigeria (Remote)

- Selected as top 3.3% (400 of 12,000) of a 10-stage intensive software engineering programme.
- Built and deployed responsive web apps in Next.js, TypeScript and Tailwind CSS, including **Audiophile** (a premium-audio e-commerce store with cart and checkout), an **invoice management app**, an **AI-powered Chrome extension** that summarises web page content, and a **habit-tracking progressive web app**.

DSI Football — Full-Stack Developer · May 2025 – Sept 2025 · Lagos, Nigeria (Remote)

- Built the editorial admin dashboard for a sports media platform with Next.js and TypeScript, designing the UI flows the team used to publish match reports and articles.
- Integrated Supabase (Postgres) for data, authentication and storage handling the database and backend layer so the dashboard could create, edit, and publish content end to end.
- Built reusable, type-safe components, role-based UI states and image upload UI in TypeScript, keeping the interface consistent across the app.

D'hub Technologies — Frontend Developer · Aug 2024 – Jan 2025 · Lagos, Nigeria (Remote)

- Built the **main landing page and About page** of the marketing site, translating Figma designs into pixel-perfect, responsive layouts across mobile, tablet and desktop.
- Used **Framer Motion** for animations and micro-interactions on landing pages, refactored legacy frontend code, and resolved critical UI defects alongside the engineering team.

EDUCATION

Caleb University · Imota, Lagos · *Graduated Jan 2025*

B.Sc. Computer Science · **First Class Honours**

- Relevant coursework: Data Structures & Algorithms, Software Engineering, Database Management Systems, Computer Networking.

AWARDS

- **Excellence in Software Development Award** · OneData, Nigeria · Jan 2025
- **Creativity and Impact in Software Solutions Award** · Joseph Generation, Sweden · Jan 2025
